

Pain Week

UNIVERSITY OF TORONTO
INTERFACULTY PAIN CURRICULUM

2024 Facilitator Manual - Tuesday am & pm

Graduating healthcare professionals will understand that pain is a unique and frequently encountered human problem that requires comprehensive care. They will begin to develop the skills required to render sound, evidence-based clinical judgments needed for pain assessment and management within their individual and interprofessional team's scope of practice.

**This package contains:**

- ✓ **This Manual** (Agenda, Timeline & Activity Outline, IPC Schedule, Key Messages, IPC Objectives and Learning Objectives)
- ✓ **Nametags and Markers**
- ✓ Instructions, including for **Attendance Code** for the day
- ✓ A **Manual for Wednesday's** online presentations

**Guiding Principles in the Assessment and Management of Pain**

- 01 Patients have the right to assessment and management of their pain.
- 02 Pain assessment is crucial toward understanding and managing patients' pain.
- 03 Health care professionals have an obligation to assess, understand, and manage patients' pain.
